investigative ophthalmology & visual science

A Journal of Clinical and Basic Research

EDITOR

Herbert E. Kaufman, M.D.

Professor of Ophthalmology and Pharmacology
College of Medicine
University of Florida
Gainesville, Florida

MANAGING EDITOR

Maija H. Uotila

University of Florida
Gainesville, Florida

EDITORIAL BOARD

DANIEL M. ALBERT
New Haven, Connecticut

J. STEVENS ANDREWS
Nashville, Tennessee

G. WINSTON BARBER
Philadelphia, Pennsylvania

DWIGHT A. BURKHARDT
Minneapolis, Minnesota

CHANDLER R. DAWSON
San Francisco, California

WILLIAM W. DAWSON
Gainesville, Florida

LYNETTE FEENEY
Portland, Oregon

SIDNEY FUTTERMAN
Seattle, Washington

MORTON GOLDBERG
Chicago, Illinois

PETER GOURAS
Bethesda, Maryland

DAN B. JONES
Houston, Texas

CARL KUPFER
Bethesda, Maryland

ALAN M. LATIES
Philadelphia, Pennsylvania

IRVING H. LEOPOLD
New York, New York

A. EDWARD MAUMENEE
Baltimore, Maryland

WILLIAM H. MILLER
New Haven, Connecticut

STEVEN M. PODOS
St. Louis, Missouri

FRANK M. POLACK
Gainesville, Florida

DAVID A. ROBINSON
Baltimore, Maryland

MELVIN L. RUBIN
Gainesville, Florida

ALAN B. SCOTT
San Francisco, California

MARVIN L. SEARS
New Haven, Connecticut

GERALD WESTHEIMER
Berkeley, California

Subject index*

A

Acidosis, alkalosis, and aqueous humor dynamics in rabbits, 998

Acoustic microscopy of human retina and pigment epithelium, 660

Actin filaments in normal and migrating corneal epthelial cells, 161

Acuity and behavior, visual, of monocularly deprived monkeys after retinal lesions, 469

visual, human, pattern evoked potentials for objective determination of, 1073

Adenine arabinoside, trifluorothymidine, and idoxuridine, corneal penetration compared, 1093

Adenoviral epidemic keratoconjunctivitis, cytologic diagnosis by direct immunofluorescence, 195

Adrenergic agents interacting in rabbit eye with α-melanocyte-stimulating hormone and infrared irradiation of iris, 209

timolol and others, effects on intraocular pressure in rabbit compared, 987

innervation and biogenic amines in uveal malignant melanomas, histofluorometric method for, 396

receptors, ability of drugs to bind to, in vitro determination of, 1118

Age, advancing, and capillary-free area of fovea, 1154

influence on sensitivity of cornea, 240

-related changes in free amino acid pool of rat lens, 171

Aldose reductase in retinal mural cells, 392

and sorbitol dehydrogenase distribution in substructures of normal and diabetic rat lens, 242

Alkali burns, favorable effect of ascorbate in, clinical and morphological observations on, 478

rabbit cornea, medroxyprogesterone preventing perforation by inhibiting collagenolytic activity, 21

Alkalosis, acidosis, and aqueous humor dynamics in rabbits, 998

Allergic optic neuritis, experimental, in guinea pigs, 338

Amblyopia, anisometropic and strabismic, spatio-temporal interactions in, 90

Amines, biogenic, and adrenergic innervation in uveal malignant melanomas, histofluorometric method for, 396

Amino acid, free, pool in rat lens, age-related changes in, 171

Amphibian cornea, oxygen consumption of, relationship to sodium and chloride ions and presence of drugs, 229

Anesthetics, influence on dark adaptation of monkey cone ERG, 80

Animal models for glaucoma, 592

Anisometropia and short-term occlusion, binocular interactions in human visual evoked potential after, 1070

Anisometropic and strabismic amblyopia, spatio-temporal interactions in, 90

Anterior chamber angle structures of cynomolgus monkey, light and electron microscopy of, after surgical disinsertion of ciliary muscle, 218

fluorescein distribution volume of, 633

Antibiotic-steroid combinations for treatment of *Pseudomonas* keratitis in rabbit, 553

Antibodies, antihuman IgG–antiferritin hybrid, for localizing herpes simplex virus in rabbit cornea, 779

antinuclear and DNA-binding compared, in chronic open-angle glaucoma, 757

IgE, intraocular, induced in guinea pigs with *Ascaris suum* larvae, 976

Antihuman IgG–antiferritin hybrid antibodies for localizing herpes simplex virus in rabbit cornea, 779

Anti-inflammatory action, ocular, of imidazole, 66

Antinuclear antibodies compared to DNA-binding antibodies in chronic open-angle glaucoma, 757

Anti-retina sera, pineal reactivity of, 181

Applanation tonometers, evaluation for dog eye, 963

Aqueous humor dynamics in rabbits, acidosis and alkalosis and, 998

enzyme patterns in retinoblastoma, 1039

formation and drainage of, after total iris removal and ciliary muscle disinsertion in cynomolgus monkey, 226

outflow, facility of, and choroid tension, 1062

uveoscleral, in rhesus monkey, importance of uveal reabsorption, 1008

Arterial, P_{CO_2}, changing, and acetazolamide, effects on choroidal and cerebral circulations in baboon, 576

Arteries, ophthalmic, simultaneous bilateral determination of systolic pressure of, by ocular pneumoplethysmography, 86

Ascaris suum larvae, intraocular IgE antibody induced in guinea pigs with, 976

Ascorbate, favorable effect in experimental alkali burns, clinical and morphological observations on, 478

Astrocytes of optic nerve head, gap junctions between, 582

Athymic "nude" mouse, heterotransplantation of retinoblastoma into, 256

ATPase activity, sodium-potassium bicarbonate, in retina, dependence on calcium and sodium, 1151

*January, pp. 1-104; February, pp. 105-194; March, pp. 195-260; April, pp. 261-380; May, pp. 381-474; June, pp. 475-588; July, pp. 589-686, August, pp. 687-778; September, pp. 779-882; October, pp. 883-986; November, pp. 987-1078; December, pp. 1079-1182.

Atropine mydriasis, second component of, 231
Autophagy in visual cells and pigment epithelium, 807
Autoregulation of blood flow in capillaries of human macula, 568
Avian retina, tectal projection of displaced ganglion cells in, 774
Axonal swelling, intraocular, produced by ligature of optic nerve, 537
transport blockade by acute intraocular pressure elevation in primate optic nerve head, distribution of, 640
rapid, at optic nerve head, unaffected by increased intracranial pressure, 423
Axoplasmic transport, orthograde and retrograde, during acute ocular hypertension in monkey, 426
Azide or nitroprusside, topical, increased intraocular pressure after, 1002

B

Baboons, choroidal and cerebral blood flow in, measured by external monitoring of radioactive inert gases, 571
circulations in, responding to changing arterial P_{CO_2} and acetazolamide, 576
Basement membrane, epithelial, corneal, regeneration after thermal cauterization, 292
Basophils in vernal conjunctivitis in humans, 858
Beagle as animal model for glaucoma, 592
inherited glaucoma in, clinical manifestations of, 1135
normotensive and glaucomatous, intraocular pressure and pupil size in, effect of topical pilocarpine on, 1143
Bicarbonate, importance in retinal function, 766
and sodium-potassium ATPase activity in retina, dependence on calcium and sodium, 1151
transport, corneal endothelium, 883
Binocular interactions in human visual evoked potential after short-tern occlusion and anisometropia, 1070
Biochemical transformation of regenerating ocular surface epithelium, 14
Biogenic amines and adrenergic innervation in uveal malignant melanomas, histofluorometric method for, 396
Biosynthesis of proteins by retina, inactivation by near-ultraviolet light and effects of tryptophan, epinephrine, and catalase, 1104
Black Americans, HLA antigens and primary open-angle glaucoma in, 175
Blood-aqueous barrier, effect of theophylline on breakdown of, in rabbit, 636
flow in capillaries of human macula, autoregulation of, 568
Blue and green cone mechanisms in retinitis pigmentosa, 149
Boron hydride disulfide compound, cataractogenic effects of, 654
Bovine photoreceptor cell, localization of cyclic nucleotide phosphodiesterase activity in, 166
retina and retinal pigment epithelium, localization of cellular retinol-binding protein in, 797
Burns, alkali, favorable effect of ascorbate in, clinical and morphological observations on, 478
in rabbit cornea, medroxyprogesterone preventing perforation by inhibiting collagenolytic activity, 21

C

Calcification in retinoblastoma, 252
of soft contact lenses in patient with dry eye and elevated calcium concentration in tears, 158
Calcium, elevated concentration in tears, calcification of soft contact lenses in patient with, 158
and magnesium levels in tears, normal and in hypocalcemia and hypercalcemia, 1150
and sodium, dependence of sodium-potassium and bicarbonate ATPase activity in retina on, 1151
Candida albicans endophthalmitis, hematogenous, 498
Capillary-free area of fovea with advancing age, 1154
Carbonic anhydrase inhibitors, effect on endothelial permeability and fluxes and corneal thickness, 883
Carotid stenosis, correlation with noncontact detection of ocular pulse, 1018
Casein, retinal degeneration in cats fed. III. Taurine deficiency and ERG amplitudes, 673
Cat corneal endothelium, regenerative capacity of, 597
fed casein, retinal degeneration in. III. Taurine deficiency and ERG amplitudes, 673
optic nerve transection in. II. Effect on vessels of optic nerve head and lamina cribrosa, 442
Catalase, tryptophan, and epinephrine, effects on biosynthesis of proteins by retina, 1104
Cataractogenic effects of boron hydride disulfide compound, 654
Catecholamines, effects on intraocular pressure of conscious owl monkeys, 628
Causative factors and prevention of elevated intraocular pressure after keratoplasty, mathematical description of, 1085
Cauterization, thermal, regeneration of corneal epithelial basement membrane after, 292
Cell shape and motility, role of cytoplasmic filaments in, 1081
visual, cone, in ground squirrel, effects of hibernation on, 815
and pigment epithelium autophagy in, 807
Cellular retinol-binding protein, localization in bovine retina and retinal pigment epithelium, 797
Cerebral and choroidal blood flow in baboons measured by external monitoring of radioactive inert gases, 571
circulations in baboon, response to changing arterial P_{CO_2} and acetazolamide, 576
Chick cornea, developing, oxygen consumption in, 1060

Chick cornea—Cont'd
endothelium and epithelium, thyroid hormone in development of, 105
Chlamydial agent (guinea pig inclusion conjunctivitis agent) reinfection, resistance to, 549
Chloride compartments and permeabilities of isolated surfaces of frog lens, 512
and sodium ions and presence of drugs, relationship to oxygen consumption of amphibian cornea, 229
Chorioretinal adhesion, cryogenic, peroxidase permeability of, 873
Choroid and ciliary body, malignant melanoma of, correlation of histologic features with in vitro ^{32}P counts, 98
tension and facility of aqueous outflow, 1062
Choroidal and cerebral blood flow in baboons measured by external monitoring of radioactive inert gases, 571
circulations in baboon, response to changing arterial P_{CO_2} and acetazolamide, 576
melanoma, human eye enucleated for, fusing rod outer segments from, 678
tumors, leukocyte migration in, melanoma-associated antigens inhibiting, 176
Ciliary body and choroid, malignant melanoma of, correlation of histologic features with in vitro ^{32}P counts, 98
–iris of rabbit, specific glucocorticoid receptor in, 973
in primates, structural differences between regions of, 912
muscle of cynomolgus monkey, light and electron microscopy of anterior chamber angle structures after surgical disinsertion of, 218
disinserton and total iris removal in cynomolgus monkey, formation and drainage of aqueous humor after, 226
Clinical model, controlled comparison of therapeutic soft lenses in, 559
Clinical—Cont'd
and morphological observations on favorable effect of ascorbate in ocular alkali burns, 478
Collagen, effect of *Pseudomonas* protease on, 488
limbal, human, ultrastructure of, 864
Collagenolytic activity, medroxyprogesterone inhibiting in alkali-burned rabbit cornea and preventing perforation, 21
Compound 48/80 and prostaglandins, effects on corneal radio frequency burns, 285
Cone mechanisms, blue and green, in retinitis pigmentosa, 149
visual cells in ground squirrel, effects of hibernation on, 815
Conjunctival mucus thread, superoxide-producing system in, 762
Conjunctivitis, vernal, in humans, basophils in, 858
Contact lenses, soft, calcification of, in patient with dry eye and elevated calcium concentration in tears, 158
Cornea, amphibian, oxygen consumption of, relationship to sodium and chloride ions and presence of drugs, 229
cell metabolism in, microculture technique for evaluating in vitro, 893
chick, developing, oxygen consumption in, 1060
complications of phacoemulsification procedure, 39
damage from *Pseudomonas* exotoxin A, pathogenesis of, 73
of different species, small-angle light-scattering patterns of, 236
edema, effect on visual function, 5
endothelial pump of, 589
herpes simplex infection, recurrent, HLA types and, 756
human, organ cultures, epithelial-endothelial interactions, 269
small-angle light-scattering patterns of, interpretation of, 233
storage, short-term, 556
Cornea, human—Cont'd
stored in M-K medium, dextran flux in, 752
in M-K and moist chamber, in vitro specular microscopic study, 743
influence of age on sensitivity of, 240
isolated, sensory recording from, 541
penetrations of trifluorothymidine, adenine arabinoside, and idoxuridine compared 1093
rabbit, alkali-burned, medroxyprogesterone preventing perforation by inhibiting collagenolytic activity, 21
effect of *Pseudomonas* protease on, 488
experimental dry spots and dellen in, histopathology of, 1025
living, phosphorylase activity in, enzyme-synthetic approach to demonstrating, 1056
localization of herpes simplex virus in, by antihuman IgG–antiferritin hybrid antibodies, 779
wound healing in, 787
radiofrequency burns: effects of prostaglandins and 48/80, 285
response to *Pseudomonas aeruginosa*, histopathological and enzymatic character of, 116
thickness, effect of carbonic anhydrase inhibitors on, 883
of simplified glutathione-bicarbonate-Ringer solution on, 657
vascularization, experimentally produced, contribution of morphology to understanding of pathogenesis of, 281
Corneal endothelium bicarbonate transport and effect of carbonic anhydrase inhibitors on endothelial permeability and fluxes and corneal thickness, 883
damage from intraocular lens contact, minimizing, 1053
effect of vidarabine and related compounds on, 545
and epithelium, chick, thyroid hormone in development of, 105
human and rabbit, effect of thimerosal on, 273
pathology of, 265

Corneal endothetium—Cont'd
in rabbits, permanent destruction of, 646
and cat, regenerative capacity of, 597
epithelium, basement membrane, regeneration after thermal cauterization, 292
cells, normal and migrating, actin filaments in, 161
chick, thyroid hormone in development of, 105
enhancing fluid secretion by, 968
rabbit, electrophysiologic and morphologic effects of ophthalmic preparations on, 899
surface, human, normal and abnormal, 614
pachometer, electronic, evaluation of, 855
transplantation reaction in avascular keratoconus due to HLA-associated immune aberration against infection, 644
Corticosteroid responders, high and low, ocular hypotensive effect of epinephrine in, 530
Cryogenic chorioretinal adhesion, peroxidase permeability of, 873
Cyclic light, rats maintained in, rod outer segment phospholipid/opsin ratio of, 188
nucleotide phosphodiesterase activity in bovine photoreceptor cell, localization of, 166
Cyclophosphamide-treated mice, *Pseudomonas* eye infections in, 649
Cytochalasin B reversibly increasing outflow facility in eye of cynomolgus monkey, 47
Cytologic diagnosis of adenoviral epidemic keratoconjunctivitis by direct immunofluorescence, 195
Cytoplasmic filaments, role in motility and cell shape, 1081
Cytosine arabinoside and experimental retinal dysplasia due to, 353

D

Dark adaptation of monkey cone ERG, influence of anesthetics, ethyl alcohol, and Freon on, 80
Darkness, rats maintained in, rod outer segment phospholipid/opsin ratio of, 188
Dellen and dry spots, experimental, in rabbit cornea, histopathology of, 1025
Descending optic nerve degeneration in primates, 841
Destruction, permanent, of corneal endothelium in rabbits, 646
Dextran flux in M-K medium–stored human corneas, 752
Diabetes, experimental, permeability and patency of retinal blood vessels in, 447
Diabetic rat lens, distribution of aldose reductase and sorbitol dehydrogenase in substructures of, 242
Diffusion coefficient of krypton in rabbit ocular tissue, 83
Diffusivity, protein, in rabbit lenses, in vivo observation of, 135
Digital photogrammetric procedure with three methods of sterophotography, comparative reproducibility of, 54
Disinsertion of ciliary muscle and total iris removal in cynomolgus monkey, formation and drainage of aqueous humor after, 226
surgical, of ciliary muscle in cynomolgus monkey, anterior chamber angle structures after, 218
Displaced ganglion cells in monkey retina, 95
Distribution volume, fluorescein, of anterior chamber, 633
DNA-binding and antinuclear antibodies compared in chronic open-angle glaucoma, 757
Dog eye, evaluation of applanation tonometers for, 963; *see also* Beagle
optic nerve and retina treated by organophosphate pesticide, histopathological study of, 877
Double-membrane arrays in type II fibers of mouse extraocular muscle, 666
Drugs, ability to bind to adrenergic receptors, in vitro determination of, 1118
presence of, and sodium and chloride ions, relationship to oxygen consumption of amphibian cornea, 229
and trabecular meshwork, 475
Dry eye, calcification of soft contact lenses in patient with, 158
Dry spots and dellen, experimental, in rabbit cornea, histopathology of, 1025
Dysplasia and neoplasia, retinal. I. Induction by feline leukemia virus, 325; II. Retinoblastoma with persistence and hyperplasia of primary vitreous, 403
retinal, experimental, due to cytosine arabinoside, 353

E

Edema, macular, experimental, after lens extraction, 381
EDTA, ophthalmic, embryopathic effects of, 652
Electrical stimulation of retina by indwelling electrodes, 249
Electronic corneal pachometer, evaluation of, 855
Electro-oculography in infants, 668
Electrophysiologic and morphologic effects of ophthalmic preparations on rabbit corneal epithelium, 899
Embryopathic effect of ophthalmic EDTA, 652
Endophthalmitis, hematogenous *Candida albicans*, 498
Endothelial-epithelial interactions, human cornea organ cultures, 269
permeability and fluxes, effect of carbonic anhydrase on, 883
pump of the cornea, 589
Endothelium, corneal; *see* Corneal endothelium
Enhancing fluid secretion by corneal epithelium, 968
Enucleated human eye, immature, trabeculotomy in, 63
Enzymatic and histopathological character of corneal response to *Pseudomonas aeruginosa*, 116
Enzyme patterns, aqueous humor, in retinoblastoma, 1039
-synthetic approach to demonstration of phosphorylase activity in living rabbit cornea, 1056
Epinephrine, ocular hypotensive effect in high and low corticosteroid responders, 530
tryptophan, and catalase, effects on biosynthesis of proteins by retina, 1104

Epiretinal membranes and vitreous in vitreoretinal juncture, 416
Epithelial basement membrane, corneal, regeneration after thermal cauterization, 292
cells, corneal, normal and migrating, actin filaments in, 161
lens, from normal and Nakano mice, tissue culture of, 243
-endothelial interactions, human cornea organ cultures, 269
surface, corneal, human, normal and abnormal, 614
Epithelium, corneal; *see* Corneal epithelium
pigment; *see* Pigment epithelium
ERG amplitudes in retina of cats fed casein, 673
monkey cone, influence of anesthetics, ethyl alcohol, and Freon on dark adaptation of, 80
Ethyl alcohol, influence on dark adaptation of monkey cone ERG, 80
Extraocular muscle fibers, iontophoretically labeled, contracting with succinylcholine, ultrastructural identification of, 561
mouse, double-membrane arrays in type II fibers in, 666

F

Facility of aqueous outflow and choroid tension, 1062
and timolol, 623
Feline leukemia virus inducting retinal neoplasia and dysplasia, 325
Filaments, cytoplasmic, role in motility and cell shape, 1081
Fluid secretion, enhanced, by corneal epithelium, 968
Fluorescein distribution volume of anterior chamber, 633
Fovea, capillary-free area of, with advancing age, 1154
Free amino acid pool of rat lens, age-related changes in, 171
Freon, influence on dark adaptation of monkey cone ERG, 80
Frog lens, chloride compartments and permeabilities of isolated surfaces of, 512
pigment epithelial cell hyperpolarization in vitro, in response to light, 771
Fundus, ocular, light reflection by small areas of, 981
Fusing rod outer segments from human eye enucleated for choroidal melanoma, 678

G

Ganglion cells, displaced, in avian retina, tectal projection of, 774
in monkey retina, 95
Gap junctions between optic nerve head astrocytes, 582
Glaucoma, animal models for, 592
inherited, in beagle, clinical manifestations of, 1135
open-angle, chronic, antinuclear and DNA-binding antibodies compared in, 757
primary, and HLA antigens in black Americans, 175
treatment, methazolamide pharmacology and, 730
timolol maleate, 687
Glaucomatous and normal eyes, trabecular meshwork in, scanning electron microscopy of, 302
and normotensive beagle, intraocular pressure and pupil size in, effect of topical pilocarpine on, 1143
Glucocorticoid receptor, specific, in iris–ciliary body of rabbit, 973
responsiveness associated with HLA-B12, 61
Glutathione-bicarbonate-Ringer solution, simplified, effect on corneal thickness, 657
Gonadectomy, unilateral, not altering contralateral intraocular pressure in rabbits, 246
Gravimetric methods, simple, for ocular measurement, 580
Green and blue cone mechanisms in retinitis pigmentosa, 149
Ground squirrel, effects of hibernation on cone visual cells in, 815
Guinea pigs, experimental allergic optic neuritis in, 338
inclusion conjunctivitis agent, reinfection with, resistance to, 549
intraocular IgE antibody induced in, with *Ascaris suum* larvae, 976

H

Hamster, myopathic (UM-X7.1 strain), ocular abnormalities in, 1047
Hamster—Cont'd
ocular effects of scrapie agent in, 319
Hematogenous *Candida albicans* endophthalmitis, 498
Herpes keratitis, experimental, lack of levamisole effect on, 1148
simplex antigens, localization in rabbit cornea with anti-human IgG–antiferritin hybrid antibodies, 779
infection, lysozyme tear levels in, 850
recurrent corneal, HLA types and, 756
Heterotransplantation of retinoblastoma into athymic "nude" mouse, 256
Hibernation effects on cone visual cells in ground squirrel, 815
Histochemical psychophysics, 1
Histofluorometric method for biogenic amines and adrenergic innervation in uveal malignant melanomas, 392
Histologic features of malignant melanoma of choroid and ciliary body, correlation with in vitro ^{32}P counts, 98
Histopathologic changes after thermokeratoplasty for keratoconus, 32
and enzymatic character of corneal response to *Pseudomonas aeruginosa*, 116
study of canine optic nerve and retina treated by organophosphate pesticide, 877
HLA antigens and primary open-angle glaucoma in black Americans, 175
-associated immune aberration against infection causing corneal transplantation reaction in avascular keratoconus, 644
-B12, glucocorticoid responsiveness associated with, 61
types and recurrent corneal herpes simplex infection, 756
Michael John Hogan, M.D., memorial to, 263
Human cornea organ cultures: epithelial-endothelial interactions, 269
small-angle light-scattering patterns of, interpretation of, 233

Human cornea—Cont'd
stored in M-K medium, dextran flux in, 752
in M-K and moist chamber, in vitro specular microscopic study, 743
corneal endothelium, effect of thimerosal on, 273
epithelial surface, normal and abnormal, 614
eye, immature, enucleated, trabeculotomy in, 63
limbal collagen, ultrastructure of, 864
macula, blood flow in capillaries of, autoregulation of, 568
retina and pigment epithelium, acoustic microscopy of, 660
rod outer segments, fusing, from eye enucleated for choroidal melanoma, 678
visual acuity, pattern evoked potentials for objective determination of, 1073
evoked potential, binocular interactions in, after short-term occlusion and anisometropia, 1070
Hyaloid vasculature in primates, ultrastructure of, 408
Hypercalcemia and hypocalcemia, tear calcium and magnesium levels in, 1150
Hyperplasia and persistence of primary vitreous with retinoblastoma in retinal neoplasia and dysplasia, 403
Hypertension, ocular, acute, in monkey, orthograde and retrograde axoplasmic transport during, 426
ionophore-induced, effect of imidazole on, 853
Hypocalcemia and hypercalcemia, tear calcium and magnesium levels in, 1150
Hypophysectomy, effects on photoreceptor destruction, 940
Hypopolarization, in vitro, of frog pigment epithelial cell in response to light, 771
Hypotensive effect, ocular, of epinephrine in high and low corticosteroid responders, 530

I

Idoxuridine, trifluorothymidine, and adenine arabinoside, corneal penetration compared, 1093
IgE antibody, intraocular, induced in guinea pigs with *Ascaris suum* larvae, 976
Imidazole, effect on ionophore-induced ocular hypertension, 853
ocular anti-inflammatory action of, 66
Immune aberration against infection, HLA-associated, causing corneal transplantation reaction in avascular keratoconus, 644
Immunoelectron microscopic localization of herpes simplex virus antigens in rabbit cornea with antihuman IgG–antiferritin hybrid antibodies, 779
Immunofluorescence, direct, for cytologic diagnosis of adenoviral epidemic keratoconjunctivitis, 195
Immunogenic rubeosis iridis, experimental, 343
In vitro radio telemetry of intraocular pressure, 168
In vivo observation of protein diffusivity in rabbit lenses, 135
Increment threshold functions, VECP and psychophysical, in rod monochromat, 870
Indomethacin inhibition of prostaglandin-mediated inflammation after ocular surgery, 760
Inert gases, radioactive, external monitoring of, for measuring choroidal and cerebral blood flow in baboons, 571
Infants, electro-oculography in, 668
Inflammation, ocular, steroid acting to inhibit prostaglandin production in, 69
after ocular surgery, prostaglandin-mediated, indomethacin inhibition of, 760
Infrared irradiation of iris and α-melanocyte-stimulating hormone interacting with adrenergic agents in rabbit eye, 209
Inherited glaucoma in beagle, clinical manifestations of, 1135
Inhibition of leukocyte migration with melanoma-associated antigens in choroidal tumors, 176
Insertion, zonular, scanning electron microscopic study of, 364
Intracranial pressure, increased, failing to affect rapid axonal transport at optic nerve head, 423
Intraocular axonal swelling produced by partial, immediately retrobulbar ligature of optic nerve, 537
IgE antibody induced in guinea pigs with *Ascaris suum* larvae, 976
injection of kainic acid, neurotoxic effects after, 141
lens, minimizing damage from contact with corneal endothelium, 1053
pressure, contralateral, not altered by unilateral gonadectomy in rabbits, 246
elevated, after keratoplasty, mathematical description of causative factors and prevention, 1085
after topical azide or nitroprusside, 1002
elevation, acute, in primate optic nerve head, distribution of axonal transport blockade by, 640
of owl monkeys, conscious, effects of catecholamines on, 628
and pupil size in normotensive and glaucomatous beagle, effect of topical pilocarpine on, 1143
in rabbits, conscious, reduced by prostaglandins applied topically, 1125
effects of ketamine sedation and ketamine-pentobarbital anesthesia on, 531
effects of timolol and other adrenergic agents compared, 987
radio telemetry of, in vitro, 168
surgery, prostaglandin-mediated inflammation after, indomethacin inhibition of, 760
tension, effect of changes in P_{CO_2} on, 534
Intrusion, myelin, experimental, in nerve head, 461
Ionophore-induced ocular hypertension, effect of imidazole on, 853
Iontophoretically labeled extraocular muscle fibers contracting with succinylcholine, ultrastructural identification of, 561
Iris–ciliary body of rabbit, specific glucocorticoid receptor in, 973

Iris—Cont'd
infrared irradiation of, and α–melanocyte-stimulating hormone interacting with adrenergic agents in rabbit eye, 209
removal, total, and ciliary muscle disinsertion in cynomolgus monkey, formation and drainage of aqueous humor after, 226
Irradiations, microwave, repeated, to albino rabbit eye, effects of, 315

K

Kainic acid, neurotoxic effects after intraocular injection of, 141
Keratitis, herpes, experimental, lack of levamisole effect on, 1148
Pseudomonas aeruginosa, oral vaccination and multivalent vaccine against, 76
in rabbit, treatment with antibiotic-steroid combinations, 553
Keratoconjunctivitis, epidemic, adenoviral, cytologic diagnosis by direct immunofluorescence, 195
Keratoconus, avascular, corneal transplantation reaction in, due to HLA-associated immune aberration against infection, 644
thermokeratoplasty for, histopathologic changes after, 32
Keratoplasty, elevated intraocular pressure after, mathematical description of causative factors and prevention, 1085
Ketamine-pentobarbital anesthesia and ketamine sedation, effects on intraocular pressure of rabbit, 531
sedation and ketamine-pentobarbital anesthesia, effects on intraocular pressure of rabbit, 531
Krypton, diffusion coefficient of, in rabbit ocular tissue, 83

L

Lamina cribrosa and optic nerve head, in cats, effect of optic nerve transection on, 442
Lased and normal rabbit pigment epithelium, scanning electron microscopy of, 700
Laser radiation, long-term exposure to, retinal damage from, 521
trabeculotomy in rhesus monkey, physiological effects of, 624
Lens epithelial cells from normal and Nakano mice, tissue culture of, 243
extraction, experimental macular edema after, 381
frog, chloride compartments and permeabilities of isolated surfaces of, 512
intraocular, minimizing damage from contact with corneal endothelium, 1053
mammalian, stability of phosphofructokinase of, 126
photosensitization by 8-methoxypsoralen, 1065
rat, age-related changes in free amino acid pool of, 171
normal and diabetic, distribution of aldose reductase and sorbitol dehydrogenase in substructures of, 242
rabbit, in vivo observation of protein diffusivity in, 135
therapeutic soft, controlled comparison in clinical model, 559
Leukocyte migration, inhibition with melanoma-associated antigens in choroidal tumors, 176
Levamisole, lack of effect on experimental herpes keratitis, 1148
Ligature, partial and immediately retrobulbar, of optic nerve, producing intraocular axonal swelling, 537
Light reflection by small areas of ocular fundus, 981
response and in vitro frog pigment cell epithelial hyperpolarization, 771
-scattering, small-angle, patterns in corneas of different species, 236
patterns of human cornea, interpretation of, 233
Limbal collagen, human, ultrastructure of, 864
Limbus, outer layers of, and anterior sclera, permeability of, 866
Liver and retina pigment epithelium, vitamin A storage and peroxisomes in, 1110
Localization of cyclic nucleotide phosphodiesterase activity in bovine photoreceptor cell, 166
Lymphocytes, thymus-derived, in Vogt-Koyanagi-Harada syndrome, 179
Lysozyme tear levels in herpes simplex virus infection, 850

M

Macula, human blood flow in capillaries of, autoregulation of, 568
Macular edema, experimental, after lens extraction, 381
Magnesium and calcium levels in tears, normal and in hypocalcemia and hypercalcemia, 1150
Mammalian lens phosphofructokinase, stability of, 126
Mannitol infusion, effect on retinal function and ozygen tension, 670
Marijuana and vision after 10 years' use in Costa Rica, 689
Medroxyprogesterone preventing perforation in alkali-burned rabbit cornea by inhibiting collagenolytic activity, 21
α-Melanocyte-stimulating hormone and infrared irradiation of iris interacting with adrenergic agents in rabbit eye, 209
Melanoma, choroidal, human eye enucleated for, fusing rod outer segments from, 678
malignant, of choroid and ciliary body, correlation of histologic features with in vitro ^{32}P counts, 98
uveal, malignant, biogenic amines and adrenergic innervation in, histofluorometric method for, 396
-associated antigens inhibiting leukocyte migration in choroidal tumors, 176
Metabolism, corneal cell, microculture technique for evaluating in vitro, 893
Methazolamide pharmacology and glaucoma treatment, 730
8-Methoxypsoralen, photosensitization of lens by, 1065
Microculture technique for evaluating corneal cell metabolism in vitro, 893
Microwave irradiations, repeated, to albino rabbit eye, effects of, 315
Migrating corneal epithelial cells, actin filaments in, 161

Migration, leukocyte, inhibition with melanoma-associated antigens in choroidal tumors, 176
M-K medium, dextran flux in human corneas stored in, 752
and moist chamber–stored human corneas, in vitro specular microscopic study, 743
Monkey, acute ocular hypertension in, orthograde and retrograde axoplasmic transport during, 426
cone ERG, influence of anesthetics, ethyl alcohol, and Freon on dark adaptation of, 80
cynomolgus, anterior chamber angle structures of, light and electron microscopy after surgical disinsertion of ciliary muscle, 218
cytochalasin B reversibly increasing outflow facility in eye of, 47
total iris removal and ciliary muscle disinsertion in, formation and drainage of aqueous humor after, 226
displaced ganglion cells in retina of, 95
monocularly deprived, visual acuity and behavior after retinal lesions, 469
owl, conscious, effects of catecholamines on intraocular pressure of, 628
rhesus, laser trabeculotomy in, physiological effects of, 624
uveal reabsorption in, importance in uveoscleral aqueous outflow in, 1008
vitreal syneresis in, 1068
Monochromat, rod, psychophysical and VECP increment threshold functions, 870
Monocularly deprived monkeys, visual acuity and behavior after retinal lesions, 469
Morphological and clinical observations on favorable effect of ascorbate in alkali burns, 478
Morphology, contribution to understanding of pathogenesis of experimentally produced corneal vascularization, 281
Motility and cell shape, role of cytoplasmic filaments in, 1081
Mouse, athymic "nude" heterotransplantation of retinoblastoma into, 256
cyclophosphamide-treated *Pseudomonas* eye infections in, 649
extraocular muscle, double-membrane arrays of type II fibers in, 666
normal and Nakano, tissue culture of lens epithelial cells from, 243
Mucus thread, conjunctival, superoxide-producing system in, 762
Mural cells, retinal, aldose reductase in, 392
My last issue, 1079
Mydriasis, atropine, second component of, 231
Myelin intrusion, experimental, in nerve head, 461
Myopathic hamster (UM-X7.1 strain), ocular abnormalities in, 1047

N

Nakano mice, tissue culture of lens epithelial cells from, 243
National Eye Institute Symposium on Experimental Pathology, 265-473
Near-ultraviolet light, inactivation of biosynthesis of proteins by retina, 1104
Necturus, retina viability in, 184
Neoplasia and dysplasia, retinal. I. Induction by feline leukemia virus, 325; II. Retinoblastoma with persistence and hyperplasia of primary vitreous, 403
Nerve head, experimental myelin intrusion in, 461
Neurotoxic effects of kainic acid after intraocular injection, 141
Nitroprusside or azide, topical, increased intraocular pressure after, 1002
Noncontact detection of ocular pulse, correlation with carotid stenosis, 1018
Nucleotide phosphodiesterase, cyclic, localization of activity in bovine photoreceptor cell, 166
"Nude" mouse, athymic, heterotransplantation of retinoblastoma into, 256

O

Occlusion, short-term, and anisometropia, binocular interactions in human visual evoked potential after, 1070
Ocular abnormalities in myopathic hamster (UM-X7.1 strain), 1047
anti-inflammatory action of imidazole, 66
effects of scrapie agent in hamsters, 319
of ultraviolet radiation from 295 to 365 nm., 932
fundus, light reflection by small areas of, 981
hypertension, acute, in monkey, orthograde and retrograde axoplasmic transport during, 426
ionophore-induced, effect of imidazole on, 853
inflammation, steroid acting to inhibit prostaglandin production in, 69
measurement by simple gravimetric methods, 580
pulse, noncontact detection of, correlation with carotid stenosis, 1018
Open-angle glaucoma, chronic, antinuclear and DNA-binding antibodies compared in, 757
primary, and HLA antigens in black Americans, 175
Ophthalmic EDTA, embryopathic effects of, 652
preparations, electrophysiologic and morphologic effects on rabbit corneal epithelium, 899
preservative thimerosal, effect on rabbit and human corneal endothelium, 273
Opsin/phospholipid ratio, rod outer segment, of rats maintained in darkness or cyclic light, 188
Optic nerve, descending, degeneration in primates, 841
head astrocytes, gap junctions between, 582
and lamina cribrosa in cats, effect of optic nerve transection on, 442
primate, acute intraocular pressure in, distribution of axonal transport blockade by, 640
rapid axonal transport at, unaffected by increased intracranial pressure, 423

Optic nerve—Cont'd
ligature of, partial and immediately retrobulbar, producing intraocular axonal swelling, 537
and retina, canine, treated by organophosphate pesticide, histopathological study of, 877
transection in cats. II. Effect on vessels of optic nerve head and lamina cribrosa, 442
neuritis, allergic, experimental, in guinea pigs, 338
Oral vaccination and multivalent vaccine against *Pseudomonas aeruginosa* keratitis, 76
Orbital surface layer in rabbit superior rectus, organization of, 711
Outflow, aqueous, facility of, and choroid tension, 1062
in eye of cynomolgus monkey, cytochalasin B reversibly increasing, 47
and timolol, 623
uveoscleral, in rhesus monkey, importance of uveal reabsorption, 1008
Oxygen consumption of amphibian cornea, relationship to sodium and chloride ions and presence of drugs, 229
in developing chick cornea, 1060
tension and function, retinal, effect of mannitol infusion on, 670

P

^{32}P counts, in vitro, correlation with histologic features of malignant melanoma of choroid and ciliary body, 98
Pachometer, corneal, electronic, evaluation of, 855
Patency and permeability of retinal blood vessels in experimental diabetes, 447
Pathogenesis of corneal damage from *Pseudomonas* exotoxin A, 73
vascularization, experimentally produced, contribution of morphology to understanding of, 281
Pathology of corneal endothelium, 265
Pattern evoked potentials for objective determination of human visual acuity, 1073
Pco_2, arterial, changing, and acetazolamide, effects on choroidal and cerebral circulations in baboon, 576
changes in, effect on intraocular tension, 534
Perforation in alkali-burned rabbit cornea, medroxyprogesterone preventing by inhibiting collagenolytic activity, 21
Permeabilities, chloride, of isolated surfaces of frog lens, 512
and fluxes, endothelial, effect of carbonic anhydrase inhibitors on, 883
of outer layers of limbus and anterior sclera, 866
and patency of retinal blood vessels in experimental diabetes, 447
peroxidase, of cryogenic chorioretinal adhesion, 873
Peroxidase permeability of cryogenic chorioretinal adhesion, 873
Peroxisomes and vitamin A storage in retina pigment epithelium and liver, 1110
Phacoemulsification procedure: corneal complications, 39
Phosphofructokinase, mammalian lens, stability of, 126
Phospholipid/opsin ratio, rod outer segment, of rats maintained in darkness or cyclic light, 188
Phosphorylase activity in living rabbit cornea, enzyme-synthetic approach to demonstrating, 1056
Photogrammetric procedure, digital, with three methods of stereophotography, comparative reproducibility of, 54
Photoreceptor cell, bovine, localization of cyclic nucleotide phosphodiesterase activity in, 166
destruction, effects of hypophysectomy, pituitary gland homogenates and transplants, and prolactin on, 940
Photosensitization of lens by 8-methoxypsoralen, 1065
Physiological effects of laser trabeculotomy in rhesus monkey eyes, 624
Pigment epithelium cell, frog, hyperpolarization in response to light in vitro, 771
Pigment epithelium—Cont'd
isolation technique for localizing cellular retinol-binding protein in bovine retina and retinal pigment epithelium, 797
rabbit, normal and lased, scanning electron microscopy of, 700
and retina, human, acoustic microscopy of, 660
retinal, and liver, vitamin A storage and peroxisomes in, 1110
and visual cells, autophagy in, 807
Pilocarpine, topical, effect on intraocular pressure and pupil size in normotensive and glaucomatous beagle, 1143
Pineal reactivity of anti-retina sera, 181
Pituitary gland homogenates and transplants, effects on photoreceptor destruction, 940
Pneumoplethysmography, ocular, for simultaneous bilateral determination of systolic pressure of ophthalmic arteries, 86
Prevention of elevated intraocular pressure after keratoplasty, mathematical description of, 1085
Primates ciliary body, structural differences between regions of, 912
descending optic nerve degeneration in, 841
hyaloid vasculature, ultrastructure of 408
optic nerve head, acute intraocular pressure in, distribution of axonal transport blockade by, 640
Prolactin, effects on photoreceptor destruction, 940
Prostaglandins and 48/80, effects on corneal radiofrequency burns, 285
-mediated inflammation after ocular surgery, indomethacin inhibition of, 760
production, steroid acting to inhibit in ocular inflammation, 69
topical, reduction of intraocular pressure of conscious rabbits by, 1125
Protease, *Pseudomonas*: purification, partial characterization, and effect on collagen, proteoglycan, and rabbit corneas, 488

Proteins, biosynthesis by retina, inactivation by near-ultraviolet light and effects of tryptophan, epinephrine, and catalase, 1104
diffusivity in rabbit lenses, in vivo observation of, 135
11-*cis*-retinal-binding, restricted to retina, 768
Proteoglycan, effect of *Pseudomonas* protease on, 488
Pseudomonas aeruginosa, corneal response to, histopathological and enzymatic character of, 116
keratitis, oral vaccination and multivalent vaccine against, 76
in rabbit, treatment with antibiotic-steroid combinations, 553
exotoxin A, pathogenesis of corneal damage from, 73
eye infections in cyclophosphamide-treated mice, 649
protease: purification, partial characterization, and effect on collagen, proteoglycan, and rabbit corneas, 488
Psychophysical histochemistry, 1 and VECP increment threshold functions of rod monochromat, 870
Pulse, ocular, noncontact detection of, correlation with carotid stenosis, 1018
Pupil size and intraocular pressure in normotensive and glaucomatous beagle, effect of topical pilocarpine on, 1143

R

Rabbits, acidosis, alkalosis, and aqueous humor dynamics in, 998
albino, effects of repeated microwave irradiations to eye of, 315
breakdown of blood-aqueous barrier in, effect of theophylline on, 636
cornea, alkali-burned, prevention of perforation by medroxyprogesterone, 21
effect of *Pseudomonas* protease on, 488
experimental dry spots and dellen in, histopathology of, 1025
living, phosphorylase activity in, enzyme-synthetic approach to demonstrating, 1056
Rabbits, cornea—Cont'd
localization of herpes simplex virus in, by antihuman IgG–antiferritin hybrid antibodies, 779
wound healing in, scanning electron microscopy of, 787
corneal endothelium, effect of thimerosal on, 273
permanent destruction of, 646
regenerative capacity of, 597
corneal epithelium, electrophysiologic and morphologic effects of ophthalmic preparations on, 899
Rabbit intraocular pressure, conscious, reduction by topically applied prostaglandins, 1125
contralateral, not altered by unilateral gonadectomy, 246
effects of ketamine sedation and ketamine-pentobarbital anesthesia on, 531
effects of timolol and other adrenergic agents compared, 987
iris, interaction of adrenergic agents with α-melanocyte-stimulating hormone and infrared irradiation in, 209
–ciliary body, specific glucocorticoid receptor in, 973
lenses, in vivo observation of protein diffusivity in, 135
ocular tissue, diffusion coefficient of krypton in, 83
pigment epithelium, normal and lased, scanning electron microscopy of, 700
Pseudomonas keratitis in, treatment with antibiotic-steroid combinations, 553
superior rectus, orbital surface layer, organization of, 711
unilateral gonadectomy not altering contralateral intraocular pressure in, 246
Radiation, laser, long-term exposure to, retinal damage from, 521
Radioactive inert gases, external monitoring of, for measuring choroidal and cerebral blood flow in baboons, 571
Radiofrequency burns, corneal: effect of prostaglandins and 48/80, 285
Radio telemetry of intraocular pressure in vitro, 168
Rat lens, age-related changes in free amino acid pool of, 171
normal and diabetic, distribution of aldose reductase and sorbitol dehydrogenase in substructures of, 242
maintained in darkness or cyclic light, rod outer segment phopholipid/opsin ratio of, 188
retinal pigment epithelium, cultured, accumulation of taurine by, 201
Reflection of light by small areas of ocular fundus, 981
Regenerating ocular surface epithelium, biochemical transformation of, 14
Regenerative capacity of corneal endothelium in rabbit and cat, 597
Reinfection with chlamydial agent (guinea pig inclusion conjunctivitis agent), resistance to, 549
Retina, avian, tectal projection of displaced ganglion cells in, 774
biosynthesis of proteins by, inactivation by near-ultraviolet light and effects of tryptophan, epinephrine, and catalase, 1104
blood vessels in experimental diabetes, permeability and patency of, 447
bovine, and retinal pigment epithelium, localization of cellular retinol-binding protein in, 797
damage from long-term exposure to laser radiation, 521
degeneration in cats fed casein. III. Taurine deficiency and ERG amplitudes, 673
dysplasia, experimental, due to cytosine arabinoside, 353
electrical stimulation by indwelling electrodes, 249
function, importance of bicarbonate in, 766
and oxygen tension, effect of mannitol infusion on, 670
lesions, visual acuity and behavior of monocularly deprived monkeys after, 469
monkey, displaced ganglion cells in, 95
mural cells, aldose reductase in, 392

Retina—Cont'd
neoplasia and dysplasia. I. Induction by feline leukemia virus, 325; II. Retinoblastoma with persistence and hyperplasia of primary vitreous, 403
and optic nerve, canine, treated by organophosphate pesticide, histopathological study of, 877
pigment epithelium, bovine, localization of cellular retinol-binding protein in, 797
human, acoustic microscopy of, 660
and liver, vitamin A storage and peroxisomes in, 1110
of rat, cultured, accumulation of taurine by, 201
11-*cis*-retinal-binding protein restricted to, 768
sodium-potassium and bicarbonate ATPase activity in, dependence on calcium and sodium, 1151
ultrastructure in advanced retinitis pigmentosa, 947
viability in Necturus, 184
11-*cis*-Retinal-binding, protein restricted to retina, 768
Retinitis pigmentosa, advanced, retinal ultrastructure on, 947
blue and green cone mechanisms in, 149
Retinoblastoma, aqueous humor enzyme patterns in, 1039
calcification in, 252
heterotransplantation into athymic "nude" mouse, 256
with persistence and hyperplasia of primary vitreous in retinal neoplasia and dysplasia, 403
Retinol-binding protein, cellular, localization in bovine retina and retinal pigment epithelium, 797
Rod monochromat, psychophysical and VECP increment threshold functions, 870
outer segments, fusing, from human eye enucleated for choroidal melanoma, 678
phospholipid/opsin ratio of rats maintained in darkness or cyclic light, 188
Rubeosis iridis, immunogenic, experimental, 343

S

Sclera, anterior, and outer layers of limbus, permeability of, 866
Scleral spur and scleral roll, 925
Scrapie agent, ocular effects of, in hamsters, 319
Sensory recording from isolated cornea, 541
Short-term corneal storage, 556
Simultaneous bilateral determination of systolic pressure of ophthalmic arteries by ocular pneumoplethysmography, 86
Small-angle light-scattering patterns of corneas of different species, 236
of human cornea, interpretation of, 233
Sodium and calcium, dependence of sodium-potassium and bicarbonate ATPase activity in retina on, 1151
and chloride ions and presence of drugs, relationship to oxygen consumption of amphibian cornea, 229
-potassium and bicarbonate ATPase activity in retina, dependence on calcium and sodium, 1151
Soft lenses, therapeutic, controlled comparison in clinical model, 559
Sorbitol dehydrogenase and aldose reductase distribution in substructures of normal and diabetic rat lens, 242
Spatio-temporal interactions in anisometropic and strabismic amblyopia, 90
Specular microscope in in vitro study of human corneas stored in M-K and moist chamber, 743
Stability of mammalian lens phosphofructokinase, 126
Stenosis, carotid, correlation with noncontact detection of ocular pulse, 1018
Stereophotography, digital photogrammetric procedure with three methods of, 54
Steroid action in ocular inflammation: inhibition of prostaglandin production, 69
antibiotic combinations for treatment of *Pseudomonas* keratitis in rabbit, 553
Storage, corneal, short-term, 556
Strabismic and anisometropic amblyopia, spatio-temporal interactions in, 90
Structural differences between regions of ciliary body in primates, 912
Succinylcholine, response of iontophoretically labeled extraocular muscle fibers, ultrastructural identification of, 561
Superior rectus, organization of orbital surface layer in rabbit, 711
Superoxide-producing system in conjunctival mucus thread, 762
Surface epithelium, ocular, regenerating, biochemical transformation of, 14
layer, orbital, organization of, in rabbit superior rectus, 711
Syneresis, vitreal, in rhesus monkeys, 1068
Systolic pressure of ophthalmic arteries, simultaneous bilateral determination by ocular pneumoplethysmography, 86

T

Taurine accumulation by cultured retinal pigment epithelium of rat, 201
deficiency in retina of cats fed casein, 673
Tear calcium and magnesium levels, normal and in hypocalcemia and hypercalcemia, 1150
elevated calcium concentration in, calcification of soft contact lenses in patient with, 158
lysozyme level in herpes simplex virus infection, 850
Tectal projection of displaced ganglion cells in avian retina, 774
Tension, intraocular, effect of changes in P_{CO_2} on, 534
Theophylline, effect on breakdown of blood-aqueous barrier in rabbit, 636
Therapeutic soft lenses, controlled comparison in clinical model, 559
Thermal cauterization, regeneration of corneal epithelial basement membrane after, 292
Thermokeratoplasty for keratoconus, histopathologic changes after, 32
Thimerosal, effect on rabbit and human corneal endothelium, 273
Thymus-derived lymphocytes in Vogt-Koyanagi-Harada syndrome, 179

Thyroid hormone in development of chick corneal endothelium and epithelium, 105
Timolol and facility of outflow, 623
maleate, new glaucoma medication, 687
and other adrenergic agents, effects on intraocular pressure in rabbit compared, 987
Tissue culture of lens epithelial cells from normal and Nakano mice, 243
Tonometers, applanation, evaluation for dog eye, 963
Topical azide or nitroprusside, increased intraocular pressure after, 1002
pilocarpine, effect on intraocular pressure and pupil size in normotensive and glaucomatous beagle, 1143
prostaglandins, reduction of intraocular pressure of conscious rabbits by, 1125
Trabecular meshwork, drugs and, 475
in normal and glaucomatous eyes, scanning electron microscopy of, 302
Trabeculotomy in immature, enucleated human eye, 63
laser, in rhesus monkey, physiological effects of, 624
Transplants, pituitary gland, effects on photoreceptor destruction, 940
Trifluorothymidine, adenine arabinoside, and idoxuridine, corneal penetration compared, 1093
Tryptophan, epinephrine, and catalase, effects on biosynthesis of proteins by retina, 1104

U

Ultrastructure of human limbal collagen, 864
retinal, in advanced retinitis pigmentosa, 947
Ultraviolet radiation from 295 to 265 nm., ocular effects of, 932
Uveal melanomas, malignant, biogenic amines and adrenergic innervation in, histofluorometric method for, 396
reabsorption, importance in uveoscleral aqueous outflow in rhesus monkey, 1008
Uveoscleral aqueous outflow in rhesus monkey, importance of uveal reabsorption, 1008

V

Vaccination, oral, and multivalent vaccine against *Pseudomonas aeruginosa* keratitis, 76
Vascularization, corneal, experimentally produced, contribution of morphology to understanding of pathogenesis of, 281
Vasculature, hyaloid, in primates, ultrastructure of, 408
VECP and psychophysical increment threshold functions of rod monochromat, 870
Vernal conjunctivitis in humans, basophils in, 858
Vidarabine and related compounds, effect on corneal endothelium, 545
Vision and marijuana after 10 years' use in Costa Rica, 689
Visual acuity and behavior of monocularly deprived monkeys after retinal lesions, 469
human, pattern evoked potentials for objective determination of, 1073
cells, cone, in ground squirrel, effects of hibernation on, 815
and pigment epithelium, autophagy in, 807
evoked potential, human, binocular interactions in, after short-term occlusion and anisometropia, 1070
pattern, for objective determination of human visual acuity, 1073
function, effect of corneal edema on, 5
Vitamin A storage and peroxisomes in retina pigment epithelium and liver, 110
Vitreal syneresis in rhesus monkeys, 1068
Vitreoretinal juncture, epiretinal membranes and vitreous in, 416
Vitreous and epiretinal membranes in vitreoretinal juncture, 416
primary, persistence and hyperplasia of, with retinoblastoma in retinal neoplasia and dysplasia, 403
Vogt-Koyanagi-Harada syndrome, thymus-derived lymphocytes in, 179

W

Wound healing in rabbit cornea, 787

Z

Zonular insertion, 364
